- Agenda:** This class is directed toward seasonal operators that maintain or manage water systems at private or public campgrounds and similar facilities. The agenda will cover a wide range of topics ranging from “the big picture” to practical tips to preparing for state or accreditation inspections. Topics to be discussed include:
1. Water cycle and groundwater flow to wells
 2. NH geology and naturally-occurring drinking water contaminants
 3. Well construction and water quality
 4. Common sources of groundwater contamination and well protection tips
 5. Storage, distribution & treatment system construction and maintenance
 6. Seasonal start-up and shut-down practices
 7. Bacteria problems – causes and cures
 8. Wastewater system considerations
 9. State inspections – what to expect

*This program is generously supported with funds from **U.S. EPA**.*
